INTERSEASONAL HEAT TRANSFER

Demand Served by Residential Heating End-Use Technologies in DECC-1A-IAB-2A

Demand Served by Services Heating End-Use Technologies in DECC-1A-IAB-2A

Source: Pathways to 2050-Key results. Markal Model Review and Scenarios for DECC's 4th Carbon Budget Evidence Base. Final Report. May 2011

DECC, and others, predict a large increase in use of heat pumps and a fall in use of gas boilers for heating.

The reality is that ground source heat pump installations in the UK are falling.

Only 2 ground source installations have been accredited for RHI by June 2012.
